Tourism has huge significance as a global economic and social phenomenon, and given the growing reliance on the industry by service-dependent economies around the world, the lack of focus on tourism planning and development in South Asia is surprising. Current issues including social, environmental and cultural aspects underpinned by security challenges have defined the tourism development narratives in many South Asian countries over the last decades and lead to fluid demand and supply patterns. The appetite for and reliance on tourism growth is seen regardless of the numerous challenges faced by the region. Despite a rich and steady history of tourism and demand driven by numerous pull-destinations, most South Asian countries have not invested or benefitted from global tourism growth trends.

Greenland is becoming a critically important territory in terms of tourism, climate change and competition for resource ... it has been poorly represented in academic literature. Tourism now features as a major source of income for the territory alongside fisheries. Cruise tourism is increasing rapidly, and might superficially appear to be best suited to Greenlandic conditions, given the lack of large-scale accommodation infrastructure and almost non-existent land routes between settlements. Ironically, one of the most spectacular tourist attractions is the large number of icebergs that are being calved as the ... retreat and ice cap melting, both appearing to be taking place at ever increasing rates. As a consequence of ice removal, the territory's claimed extensive range of mineral resources, not least rare earth elements and hydrocarbons, are ... for exploitation and, thereby, are acting increasingly as the focus for geopolitical competition. This book explores the nature of dynamics between tourism, climate change and the geopolitics of natural resource exploitation in the Arctic ... their interrelationships specifically in the critical context of Greenland, but within a framework that emphasises the wider global implications of the outcomes of such interrelationships.

OECD Tourism Trends and Policies 2020

These include a more stable macroeconomic environment through the fiscal consolidation programme, a more favourable balance of trade buttressed by expanding oil exports and an increasingly sophisticated financial system, as evidenced by a soon-to-be-launched commodities exchange and increased integration with regional and international securities markets. Risks remain, however. High interest rates, inflation and public debt in the face of stubbornly low levels of private sector lending and insurance penetration will likely remain through 2017. Nonetheless, the government has demonstrated a commitment to undertaking the structural reforms that are necessary to bring down interest rates, stabilise the currency and get Ghana's fiscal house in order.

and poverty. The results for 2007–10 highlight a significant reduction in inequality among Nicaraguans based on better distribution of income and consumption. This has been possible owing to redistributive government policies with positive results,
The governance of transitions - The Transitions of Governance, in part, aims to provide building blocks which government and society could use to develop strategies for creating sustainable outcomes. It considers what kind of leadership, and fragile communities? What emerges is a compilation of chapters that introduce different parts of a solution which can be used in developing both a growing body of practices of "governed" societal transitions and the associated transition of innovation, especially in sectors where it was never deemed necessary or possible before. This book asks: What type of governance is helpful for developing new societal institutions and systems that can overcome systemic crises in emerging economies?

Why is societal transition not simply a matter of change management or normal policy design? South Africa is living proof... a society to reinvent and reinstall itself. With the advent of new societal challenges, came the need for real societal...

The ASEAN Economic Community (AEC) is set to come into force in 2015, providing a roadmap for economic integration and growth in Southeast Asia. While the majority of ASEAN economies are dependent on the manufacturing sector, the Philippines has a clear commitment to diversifying its economy. The Philippines, as a member of the AEC, is expected to benefit from increased trade and investment opportunities, which could help to spread manufacturing and business process outsourcing growth across the country, and clear obstacles to developing other sectors where outlying regions have strong potential. 2015 is set to mark the inaugural year of the ASEAN Economic Community, with the Philippines playing an integral role in the foundation of this ambitious regional venture.

The Government has been widely commended for its efforts to improve business conditions and reduce corruption, while a relatively conservative fiscal policy has helped boost the economy's credibility and steer investment into the private sector. The rapid growth of the Philippines' tourism industry, particularly in the areas of business services and manufacturing, has been instrumental in the country's economic development. The government's efforts to promote the country as a destination for business travel and tourism are expected to continue to drive the economy forward.

The Philippines has also been making significant strides in the areas of agricultural and financial services for rural communities. The government has introduced several initiatives to encourage rural-agricultural development and improve access to financial services for farmers, which is expected to contribute to the country's economic growth. The government's commitment to rural development and infrastructure improvements is expected to support the growth of the country's agricultural sector and provide opportunities for rural communities to benefit from the economic development occurring in urban areas.
Prospects and Challenges of Community-Based Tourism and Changing Demographics

Tourism Trends and Policies, published biennially, analyses tourism performance and major policy trends, initiatives and reforms across 50 OECD and partner countries, providing up-to-date tourism data and analysis.

Fiji Tourism Development Plan, 2007-2016

The 2018 edition analyses tourism performance and policy trends across 49 OECD countries and partner economies. It highlights the need for coherent and comprehensive approaches to tourism policy making, and the significance of the tourism economy, with data covering domestic, inbound and outbound tourism, enterprises and employment, and internal tourism consumption.

Climate Change and Cities

This book focuses on the planning, marketing, and management of Asian tourism destinations, and evaluates current developments within Southeast-Asia and the wider Asia-Pacific region. As more Asian destinations enter the global tourism arena and more Asian travellers look to explore destinations in Asia and beyond, an understanding of how Asian destinations practice tourism is crucial to the future sustainable development of global tourism. This book provides an invaluable stock of research and knowledge based on the Asian practice and experience in destination planning, marketing, and management, offering insights into the latest development and trends in the region.

The Report: Philippines 2015

The 2020 edition analyses tourism performance and policy trends across 51 OECD countries and partner economies. It highlights the need for coherent and comprehensive approaches to tourism policy making, and the significance of the tourism economy, with data covering domestic, inbound and outbound tourism, enterprises and employment, and internal tourism consumption.
